

Managed Print Solutions

Managing your print fleet, so you don't have to!

TURNKEY SOLUTIONS

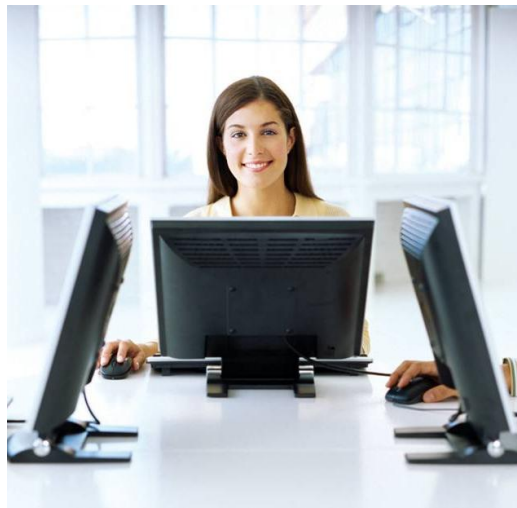

Our print management solution is truly a turnkey program. From the moment you implement our software until the printer is retired, all aspects of your printing processes are monitored.

STREAMLINE PROCESS

The software provided by Strategic Printing Solutions will assist your company in developing a managed printing process. Once the software is installed, your printers will be monitored from install to toner replacement.

SECURITY

CarbonSix software is secure and offers no threat to network security. Our software only collects information on network attached printing devices.

- Through daily activities, your business lives out its vision and core strategy. Continually improving upon these processes will give your company a strong competitive advantage.
- A large portion of your IT management is dedicated to your print fleet. By allowing SPS to provide you a managed solution, your employees are free to perform their core job functions. IT personnel can redirect their focus to new strategies and business development.
- Let us manage your printer fleet with one managed, simple model.

Growing your business shouldn't be costly.

- No capital expenditures for your new print fleet
- Automatic replenishment of consumables to their specific printer location
- Monitoring devices to eliminate downtime
- Manage all of your printers with our software that recognizes all major manufacturers
- Allow your IT department to focus on growth issues instead of printing issues

Growing your business shouldn't be painful.

- Ease of invoicing//flexible billing:
Departmental billing or one consolidated bill
- Eliminate overstocked and out of stock consumables
- Eco-friendly practices reduce power consumption and consumables usage
- Asset Management
