

“Our Partnership with SPS has been very advantageous to ODFL. SPS provides us a cost effective way to acquire our print fleet and to proactively manage our consumables in both our corporate office as well as all our remote service centers.”

“With updated printers and proactive shipping of consumables, we have experienced much higher productivity corporate wide. The SPS program has assisted our help desk in providing a quicker response to our service centers and has reduced the number of printer service calls. We would recommend strong consideration of this effective solution.”

Shawn Pope, Director of Computer Operations

Old Dominion Freight Line

Your business relies heavily on printing. Let Strategic Printing Solutions provide you with a print management solution that will monitor your printer fleet, enabling you to focus on your customers. Our program reduces the time your employees spend on printer related issues and allows them to return to where they are most needed. SPS understands the trucking industry through many years of servicing national LTL carriers. Our experience will help us to identify, control, and manage your printer fleet, so you can move freight faster.
